

**Amendments to the Specification:**

Please replace paragraph [0005] with the following amended paragraph:

[0005] (1) U.S. Application No. 09/521,252, filed March 8, 2000 (Attorney Docket No. 15358-006300US), which issued as U.S. Patent No. 7,299,405.

Please replace paragraph [0028] with the following amended paragraph:

[0028] A presentation recorder is a device that is able to capture information presented during a presentation, for example, by tapping into and capturing streams of information from an information source such as a computer executing a PowerPoint application and displaying slides from a \*.ppt file. A presentation recorder may be configured to tap into the video output of the computer and capture keyframes every time a significant difference is detected between displayed video keyframes of the slides. The presentation recorder may also be configured to capture other types of information such as audio information, video information, slides information stream, etc. Time stamps indicating time of capture may also be stored by the presentation recorder. The temporal information indicating when the information was output or captured may be used to synchronize the different types of captured information streams. Examples of presentation recorders include a screen capture software application that allows recording of slides and time elapsed for each slide during a presentation. Examples of presentation recorders are described in U.S. Application No. 09/728,560, filed November 30, 2000 (Attorney Docket No. 15358-006210US) which issued as U.S. Patent No. 7,167,191, U.S. Application No. 09/728,453, filed November 30, 2000 (Attorney Docket No. 15358-006220US), and U.S. Application No. 09/521,252, filed March 8, 2000 (Attorney Docket No. 15358-006300US), which issued as U.S. Patent No. 7,299,405, whose contents are incorporated herein by reference for all purposes.
